

World Class Quality

Multimatic *Air Star* Hybrid Class

Designed for environmentally safe solvents, Multimatic Air-Star Machines feature a dual cleaning method: full immersion with spray jet. This along with many other outstanding design concepts provide for quality cleaning results while lowering utility and other costs.

Air-Star machines can be used with or without steam and do not require water or distillation. Two separate filter systems help assure solvent purity. Other features include a high efficiency cooling system and, on air-cooled models, refrigerated solvent cooling.

Operating Air-Star machines is easy with the exclusive Multimatic MultiComp III Computer that shows exactly what is happening during every step of operation. Installation is easy and stainless steel construction assures a long life of great performance.
