

# World Class Quality

*Multimatic*

*Multi*  *Star*

**Multimatic Multi-Star** – one machine for alternative solvents including hydrocarbon, GreenEarth,<sup>®</sup> glycol based solvents and other Class IIIA solvents

The variable speed motor with frequency inverter drive lets you set the speed for the fabrics pro-

cessed allowing you to handle delicate fabrics safely.

Some of the important features include copper refrigeration coils conveniently located for easy, fast maintenance and cleaning, spin disc and large capacity cartridge filters to help maintain solvent pu-

rity, oversized water separator and easy tank-to-tank transfer with exclusive “tank sweep” system. Piping, tanks, basket and basket housing are made from high quality stainless steel.

Ecological safety is assured with Multimatic Multi-Star Machines.
