Multimatic

Multi  *Star*⁺

Engineered and Built For Use With SOLVON K4

Multimatic Multi-Star+ Machines have advanced features for super performance with Solvon K4.

Here, you'll find all the features of standard Multi-Star Machines plus a dual fan drying system with increased air flow, button trap drying, a multi-speed fan motor, basket evacuation when loading door is open and super cold envi-

ronmentally friendly refrigerant.

These are in addition to easy-to-maintain copper refrigeration coils, the exclusive Multi-Comp III Contol, the oversized clean water separator and stainless steel construction.

Multi-Star+ Machines will give you

the performance you expect when using Solvon K4. They also give you versatility. You can run other alternative Class IIIA solvents in these machines so you are not locked in to a single solvent.

Your investment in Multimatic Multi-Star+ Machines will give you performance you can rely on.
