# Increase Productivity and Profits

The newest and most versatile pressing machine in the industry.

**WHY.....**

## **MF-250U Facts**

- *finishes various garments such as men's polo shirts and ladies blouses.....WHY.....this versatile design saves time because it can process so many different types of garments.*

- *heated Front Clamp.....WHY.....provides that special finish quality on the front placket.*

- *Side Expanders.....WHY..... easy to set up for slit type shirts (such as Hawaiian style or Tommy Bahama).*

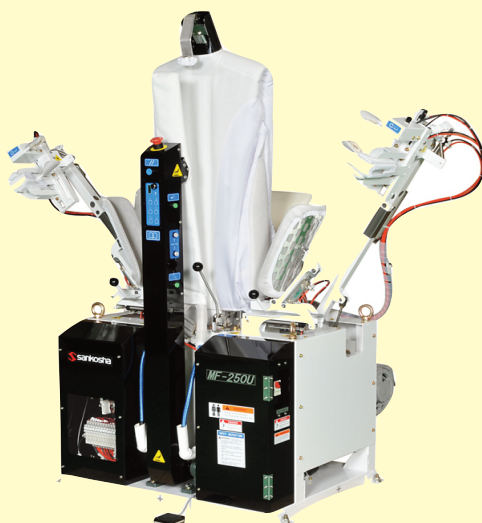

- *tensioning strength is adjustable.....WHY..... this is especially important for stretchable type garments.*

- *exclusive Tail Clamp.....WHY.....can attach all size of garments including small blouses which enhances excellent back side finish quality.*

- *stronger Blower Motor.....WHY.....makes for the best finish quality as well as capable of both wet/dry operations (35% increased power).*

- *Cuff Clamps.....WHY..... can attach both short and long sleeve cuffs. This insures the best possible finish.*

- *compact design.....WHY.....easy to operate and space costs money.*
